NEWS ITEMS FROM JARROW

The Jarrows Ladies' Aid held their regular monthly meeting on Tuesday, November 9th, at the home of Mrs. J. Waite, with 14 members and five visitors present. The meeting was addressed by the Rev. J. Kitchen, a returned missionary from China, who gave a most instructive and interesting account of his work and conditions in China.

The next meeting of the Jarrows Aid will be held on Wednesday, 1st December, at the home of Mrs. Walter Morgan. This will be the annual meeting and all members are requested to be present.

Elvin Christenson of Edmonton visited his father in Jarrows last week-end.

Ralph Peet and Hans Jamieson have gone to Edson, where they may secure work for the winter.

Mr. Arnold Christenson motored to Edmonton last Saturday to visit his family.

Mr. Jack McKinnon left Wednesday morning for Goldfields, where he will have employment for the winter.

The boys' wheat pool club met last Monday afternoon in the room above Boyd's store. Mr. S. S. Graham of Edmonton, grain inspector, addressed the boys on wheat and how to judge same. Each member had brought with him 15 lb of wheat he had raised on his plot last summer. The grain was judged by Mr. Graham who spoke very highly of the fine work done by all the boys. The quality of wheat raised was very good he said, considering the adverse conditions of the season. The samples presented by the boys consisted of good uniform kernels, the best of which weighed 67 pounds per bushel. The last prize was given to Donald Routledge; 2nd, Wm. Routledge; 3rd, James McClements; 4th, Adolph Russell. The first prize for the standing

crop on the boys' plot was won by Donald Routledge, and 2nd Ralph Erickson.

The election of officers for the ensuing year is as follows: President, Alvin Johnson; Vice-President, James McClements; Sec'y, Ralph Erickson; Leader, Mr. S. Lisson.

The next meeting of the club will be held at the home of Mr. and Mrs. S. Lisson on February 23rd, at 8 p.m. Owing to the fact that some of the boys will reach the age limit, viz. 22 years, and will have to drop out of the club, there will be room for six new members to enter the club. Every boy who expects to make farming his vocation ought to be a member of the boys' wheat pool club, for such an organization gives our boys a very fine training.

WAINWRIGHT HOSPITAL BOARD HOLD MEETING

The regular monthly meeting of the board of the Wainwright municipal hospital district was held on Saturday last when all members were present.

The minutes of the previous meeting were adopted as read.

Moved by Trustee Collette—That the action of the Chairman re installation of heater in the clothes room be approved—Carried.

Moved by Trustee Gould—That answers to questionnaire from the supervisor of hospitals as submitted be approved—Carried.

A letter was read from the Town of Wainwright re the cancellation of "indigent agreement" and the secretary was authorized to send reply.

Moved by Trustee Gardiner—That Trustee Gould attend the next meeting of Vale M.D. Council to discuss hospital affairs—Carried.

Moved by Trustee Gardiner—That the Board approve of the action of the Chairman and Secretary in the handling of recent scarlet fever case—Carried.

Moved by Trustee Collette—That Chairman and Secretary endeavor to secure suitable building to be used as isolation quarters—Carried.

Moved by Trustee Collette—That repairs be made at once to electric wiring where necessary—Carried.

Moved by Trustee Gould—That account of Miss Tweedy be refused, as case was nursing did not prove to be scarlet fever and the Board assumed no responsibility unless a case was contagious—Carried.

Moved by Trustee Bleasdale—That the bills and accounts totalling

LOCALS

Born—to Mr. and Mrs. Obert Lovis, on Nov. 10th, a son.

Keep in mind the Women's Institute bazaar on Saturday, Nov. 27th.

Mr. and Mrs. W. Hutchinson moved into their new house last Tuesday.

Mr. and Mrs. Chas. Pyle and family moved to Edmonton last week for the winter.

Born—to Mr. and Mrs. Edwin Sanders, at the Wainwright hospital, on Nov. 14, a daughter.

Mrs. Thos. Askin and baby arrived home from the Viking hospital last Tuesday morning.

Miss Taylor of Sunny Brae spent the holiday week-end at her home in South Edmonton.

Mr. T. Schleck of Wainwright is busy this week drilling a well on the rink grounds.

Travelling in cars is becoming quite difficult on account of the heavy snowfall during the past week.

Lawrence Archibald spent his Armistice holidays with his aunt, Mrs. F. Prosser, of the Albert district.

The Irma Branch, Canadian Legion, will hold a general meeting in their hall on Saturday, Nov. 20, at 8 p.m.

Mr. and Mrs. E. W. Peterson have had a visit from Mr. Peterson's parents and brother during the past week.

Mr. and Mrs. M. D. Askin left here last Sunday evening for Fort William, Ont., where they intend spending the winter.

Mr. Fred Hill moved his family into town this week where they are occupying the house recently vacated by his mother, Mrs. C. T. Hill.

Mrs. C. T. Hill left for Edmonton last Sunday where she will spend the winter at the home of her daughter, Mrs. P. J. Hardy.

The dance in Kiefer's hall on Nov. 11th under the auspices of the Irma Branch of the Canadian Legion, was well attended and everyone seemed to enjoy themselves.

Mr. R. D. Smallwood, Reeve of Battle River M. D., and Mr. Chas. Wainwright, M. D., are attending the M. D. Districts convention in Edmonton this week.

Rooms for Rent—Light Housekeeping, or room and board, suitable for students willing to keep reasonable hours. No late company allowed—Mrs. Paul Matthews.

The usual Armistice Day service was held in Kiefer's hall last Thursday morning with a full attendance.

The Irma Branch of the Canadian Legion wish to thank those who contributed to the support of the Tubercular veterans. The collection taken at the service amounted to \$8.25.

In the obituary notice last week of the late Magnus Gullbraa several names were in some unaccountable way omitted, for which we are sorry.

The names omitted are as follows: Memorial Fund, Young People's Lutheran League, Sharon Lutheran League, Mr. and Mrs. E. R. Erickson, Mr. and Mrs. W. Masson; Flower contributors, Mr. and Mrs. H. Vinjerud and O. A. Vinjerud, Peggy and Cliff, Walter and Mazel Frickleton, Mr. and Mrs. G. H. Esky and family, Mr. and Mrs. Vernon Peterson and family.

\$1354.74 be passed for payment—Carried.

The matron's report which was as follows was accepted and filed:

Patients admitted 72
Patients discharged 67
Patients in hospital 17
Maternity cases 3
Infants born 3
Medical cases 31
Surgical cases 38
Operations 29
Deaths 3

Moved by Trustee Fuller—That all domestic help and caretaker be given 30 days' notice before being discharged, and that they be required to give like notice in case of resignation—Carried.

Moved by Trustee Collette—That a metal-lined box be procured to contain the ether kept on hand—Crd.

The Board then adjourned.

FOR SALE—N.W. ¼-145-9-w. 4 M., 160 acres, 80 acres cultivated, small granary, fenced and cross fenced. \$1880.00—Terms. Write A. H. Allan, 804 Connaught Bldg., Ottawa, Ontario, Canada. 12tf

LOST—One yearling steer, branded OH with upper half diamond above on right hip. Red with white face, no horn. A reward of \$5 will be paid for its recovery.—O. Halvorsen, Irma, Alta. 19p

UNITED CHURCH NOTES

IRMA UNITED CHURCH
Rev. E. Longmire, Minister

We were greatly favored during the past week in the presence of the Rev. John Kitchen who for the past 17 years has been engaged in the missionary work of our church at Chengtu, China. This city is the capital of Szechwan province and about 2000 miles inland from Shanghai.

Mr. Kitchen in his address gave many graphic pictures of the China of 17 years ago and contrasted these with the customs and conditions of China today. Our missionary was rightfully proud of the remarkable progress made by China during these few years. Modern systems of travel by steamboat, bus and aeroplane equal to the best European or American systems are being developed; telephone and radio established and monetary reform adopted; extensive systems of education with modern schools and colleges and universities have been instituted by the national government, and the China which a few years ago was torn by internal strife is now united under one rule.

Mr. Kitchen told of the great influence the missionaries and missions of the Christian church have had and continue to hold in the life of this New China, and the great advance which has resulted with the advent of the "Church of Christ." The Christian missionary is respected and welcomed by China today, and many of the graduates from our mission college and university are being called upon by the authorities to fill important positions in the new national colleges and universities of China and serve as directors of education in the provinces.

Mr. Kitchen is personally acquainted with General Chiang Kai Chek and his devoted wife and told of their wonderful Christian character and influence, and also of the Christian faith and loyalty of other members of the Chinese government, a considerable number of whom are Christians.

Mr. Kitchen is home on furlough and expects to return to his mission charge in the near future. All who heard Mr. Kitchen will have a deeper sympathy and keener interest in the missions of our church and our responsibility and opportunity in China.

Services for Sunday, Nov. 21, are as follows: Albert 11 a.m.; Alma Mater 3 p.m.; Irma 7:30 p.m. Irma Sunday school at 11 a.m. A hearty welcome to all.

ST. MARY'S (Anglican) CHURCH
Rev. P. A. Rickard, Vicar

Service will be held on Sunday, November 21st, at 3 p.m.

The W. A. meeting will be held at the home of Mrs. J. Carter on Tuesday, November 23rd.

KINSELLA KERNELS
Mr. J. Morrison is relieving Mr. Burnett at the station.

Mr. Gilbert Stuart is visiting friends at Kinsella.

Mr. J. Kapler and L. Witton spent Sunday and Monday in the city.

The Kinsella ladies' aid are holding their annual Tea and Bazaar in the church on Saturday, Nov. 20th.

Don't forget the W. I. whist drive and dance in the club room on Saturday, November 20th.

Mr. and Mrs. F. Williams are in Edmonton this week.

Mrs. D. Williams of Edmonton spent the week-end with her parents.

BY THE WAY

One-fourth teaspoon of vanilla added to each four cups of milk improves the flavor of hot cocoa or chocolate.

Do not peek at steaming dumplings for at least ten minutes or they are likely to fall.

Have you seen the new rubber bags to keep lettuce and celery moist and fresh in your refrigerator? Fish or cheese may also be put away in these bags and will not then affect other foods with their odors.

In selecting a soup for a meal, remember that creamed soups should not be served when there are creamed vegetables or creamed fish.

To brown pies and tarts, brush milk lightly on the tops before putting them in the oven. To glaze pies, brush them with the white of an egg.

If a tablespoon of molasses is added to filling when making pumpkin pies, pies will bake a rich golden brown.

HIGH SCHOOL REPORT

The following is a report of the tests given in the present fall term in the Irma high school up to the first week in November. A. H. indicates an average honour standing; 1, 6 would indicate that the student passed on seven subjects and secured an honour standing on one; the first figure always giving the number of honour standings.

Grade Twelve—
Marion Carrington A. H.
Clarence Carter 2, 4.
Bob Charter 1, 6.
Mildred Hill A. H.
Philip Inklin 1, 0.
Mary Jones A. H.
Harold Guibras 3, 1.
Arthur Knudson 0, 5.
Ethel Tate A. H.
Muriel Wakefield 4, 4.

Grade Eleven—
Ethel Arnold 0, 5.
Louisa Barber A. H.
Gwendolyn Burton 1, 6.
Agnes Craig 4, 3.
Jean Craig 4, 4.
Bill Inklin 0, 1.
Clifford Jones 0, 6.
Jessie Milton 0, 5.
Arthur Peterson 4, 3.
Violet Whidden 1, 4.

Grade Ten—
Stella Arnold 1, 4.
Allison Carter 0, 4.
Philip Charter 0, 4.
Percy Congdon 0, 3.
Lillian Inklin 0, 3.

James Soneff 1, 5.
Jacqueline Tate A. H.
John Archibald 0, 3.
Donald Burton 1, 5.

"Great Scott!" said a newly-wedded husband on arriving home from work the other day and finding broken crockery all over the floor of the kitchen, "Whatever has happened?"

"Well, you see I have been taking note of the lessons in cooking that come over the radio," she replied, "and she said that an old cup without a handle will do for measuring—and it's taken me 11 tries to get a handle off without breaking the cup."

WEDDING BELLS

SMALLWOOD—KJOS

A very pretty wedding was solemnized in the home of Mr. and Mrs. K. T. Kjos of Cadogan, at 2:30 p.m. Friday, November 12, when their third daughter, Margaret Clara, became the bride of Silas Clifford, second son of Mr. and Mrs. R. D. Smallwood, of Irma, Alberta. Rev. Ege-dahl of Provost officiated.

The bridal couple and attendants marched into the parlor to the strains of Lohengrin's Bridal Chorus played by Mrs. T. T. Jevne. The bride, carrying a bouquet of carnations, was charming in a floor-length dress of white satin with veil and orange blossoms. She was attended by her sister, Inga, gowned in a floor-length dress of yellow silk lace. The groom was attended by his brother Alex. Erna Mills, acting as flower girl, and Thorstein Lerohi as ring-bearer, performed their little duties very well.

The parlor was decorated in pink and white, streamers converging to an archway made of streamers and bells, under which the ceremony took place.

When pictures had been taken a splendid dinner was served in the dining room, also decorated in pink and white. Mrs. O. Lakevold and Gladys Kjos served the dinner. Lars Lerohi, officiating as toastmaster, called upon various members of the group for short addresses. The guests were: Mr. and Mrs. R. D. Smallwood, Irma; Mrs. E. Mills and daughters, Edmonton; Mr. and Mrs. T. T. Jevne, Mr. and Mrs. L. C. Lerohi and Thorstein, and Mrs. P. Kvien, all of Wetaskiwin; Mr. Thomas Kjos, of Cadogan; and Mr. O. Lakevold and sons of Provost.

The bridal couple were the recipients of many beautiful gifts. The evening was very enjoyably spent in games and music.

After a lunch the bridal couple left for Edmonton where they will spend a brief honeymoon. Following the honeymoon they will return to Irma where they will make their home for the present.

Irrigation And Immigration

Two major questions of public policy are at the present time engaging a good deal of attention in Western Canada. Frequent reference being made to them at meetings of organizations and in the news and editorial columns of the daily press. They are the problems of irrigation and immigration.

On the face of it, it may appear that these two questions have little or nothing in common with one another but a little reflection shows that they are, or ought to be, closely related when either subject is brought up for discussion and consideration.

Their relationship becomes apparent when it is remembered that the economic fate of the farmer of the present day in the West and that of the future settler is dependent upon the presence or absence of sufficient moisture to ensure the growth of field crops and the maturity of livestock, and when consideration is given to the probability, nay almost the certainty, that the West will again sometime in the future be subjected the ravages of drought.

Much of the present day opposition to immigration would vanish into thin air if there were some assurance that the next visitation of drought conditions would witness a supply of irrigable water in storage for the maximum acreage that could be served from this source in such an eventuality.

History, as demonstrated by geological data and revealed in the growth of trees over the past 200 or 300 years, has shown that the prairies for centuries have been subject to recurrent periods of drought of varying intensity and duration and there is no reason to believe that in this respect history will not repeat itself in the future. In fact, meteorological and other authorities appear to be in unanimous agreement on this point and only recently one expert was quoted as stating that the West will always be subject to drought periods.

This being taken for granted it appears to be a rational suggestion that advantage should be taken of the experience of the past eight years to provide, as soon as possible, for the storage of available waste water to the maximum extent of engineering feasibility.

To some extent this is being done under the Prairie Farm Rehabilitation Act, but where the programs being carried out or mapped out for future undertaking meet the desideratum of maximum engineering possibility is debatable.

It is true that it would be folly to attempt to carry out projects which are beyond the realm of engineering feasibility, but there are some authorities who contend that some schemes which come within this scope should not be undertaken because they are not economically sound, in other words, they would be so expensive that they could not possibly be self supporting. Crop returns could not support the overhead, is the contention.

It is just these projects, those which are feasible from the engineer's viewpoint but regarded in some quarters as economically unsound which might well be subjected to further scrutiny and survey in the hope that some measures might be devised to relieve them, if constructed, of some portion of the overhead which seems to be the stumbling block.

If, for example, these projects in the doubtful economic category could be utilized as a form of public works program, financed substantially by grants in aid from the Dominion treasury, at least to the extent to which cash is now being donated for the same number of the same number of men who are idle, can it be doubted that some of these undertakings might be relieved of sufficient carrying charges to bring them within the scope of economically feasible undertakings as well as engineering possibilities?

It has been urged that the Dominion government has no legal authority under the British North America Act to carry out public works except through grants to the provinces, but assistance presumably can be legally given in that form and, if so, why not?

The point is that large sums of money are now being expended from the Federal treasury to sustain thousands of families without giving them an opportunity to contribute a quid pro quo. If some of this money could be utilized to provide work for a substantial number on projects which would be of permanent benefit to the principal industry of the West, agriculture, it would serve the double purpose of maintaining the morale of large numbers and possibly of making economically feasible some projects which are now in the doubtful class by relieving them of a portion of the carrying charges. At any rate, the idea is worthy of further investigation on the part of the authorities.

While immigration as a topic has been more or less shelved during the summer months and particularly after it became apparent that the West as a unit was to sustain this year a disaster of the greatest magnitude there are indications that efforts are being made to actively promote settlement schemes in the immediate future. Brigadier-General Hornby was recently quoted as stating that the time for talk has passed and action must be taken and Commissioner Lamb of the Salvation Army is touring the West, presumably particularly interested in the question of migration from the British Isles.

To the average individual farmer and farmer organizations any proposal to push immigration and settlement schemes at this time appears to be unpropitious, but to the extent to which crop yields can be assured in future through irrigation and conservation projects, to that extent at least, opposition to plans to bring more people into the country to engage in agricultural pursuits would diminish.

A collic once found its way from Indiana to Oregon, a distance of about 2,000 miles.
Rice grown by irrigation in Java this year will weigh more than 149,000,000,000 pounds.

Royal Ulster Rifles

Organized In 1793, And Engaged In Battles During Last 150 Years

The Royal Ulster Rifles, raised in 1793, carries on its colors the battle honors of most of the major battles in which British troops have been engaged in the last 150 years.

Its allied regiment in the Canadian militia is the Lorne Rifles, of Georgetown, Ont.

The Ulsters were composed of the old 83rd and 86th foot. The 83rd was raised in Dublin for service in the West Indies, while the latter was a Shropshire regiment, being first known as the Shropshire Volunteers. When the present system was adopted, the two were combined as the Royal Irish Rifles.

Following the treaty with the Free State in 1922, five famous Irish regiments disappeared from British army lists. The Royal Irish, however, were retained, their name being changed to the Royal Ulster Rifles and a recruiting area in northern Ireland being allotted to them.

The regiment fought under the Duke of Wellington throughout the Peninsular War of 1808-14, and was represented at all the big battles of the famous campaign, including Talavera, Bourbon, Busaco, Fuentes d'Onor, Ciudad Rodrigo, Badajoz, Salamanca, Vittoria, Nivelle, Orthes and Toulouse.

Both battalions served in India during the mutiny of 1857, and the colors carry "Central India" to commemorate the regiment's service. In the Boer War the Second Battalion served throughout the campaign.

The Great War saw the Ulsters in action at the Battle of Mons in 1914, and thereafter they were in every major engagement in France and Flanders until 1918.

Other battalions were at the Suvla Landing in Gallipoli and at the Battle of Haifa, later serving in the Palestine campaign and taking part in the several battles of Gaza and the capture of Jerusalem.

Air Line Pilots

Will Wear Uniform Of Navy Blue

Style notes for Trans-Canada Air Lines pilots have been issued.

The well-dressed pilot will wear a uniform of navy blue and of navy cut—and he will look much like an officer of the royal navy.

A pattern uniform, soon to be sent to the operating department at Winnipeg for suggestions as to details, consists of a double-breasted "monkey jacket" and trousers known as "slacks." An immaculate crease, too, will grace them.

Caps, it was announced, will not be worn in the plane, but pilots will have small toques to use in cold weather. Rank badges have not yet been decided upon.

Insignia of the line, formally approved by directors, consists of a maple leaf within a circle 20 inches in diameter. The circle is of gold rimmed with blue. Impressed on the leaf, which is in autumn colors, is a conventionalized bird in flight—somewhat similar to Imperial Airways' device—and the gold letters T.C.A.

The design will be placed on port and starboard sides of the plane's nose forward of the pilot's cab.

"Canada 1937"

This Season's Broadcasts Bringing A New Experience To Canadian Listeners

The radio series "Canada 1937" which scored much success last season started again last week. This season, this most spectacular of Canadian broadcasts will be heard Friday evenings at 10:00 p.m., E.S.T. Outstanding commentators under the guidance of Vernon Bartlett will again speak from Europe—an interviewer in Canada probing for answers to the questions of the "man in the street."

Lionel Shapiro, Canadian correspondent in New York, will speak from N.Y.C. studios, relaying such latest happenings of the Gay White Way as are of interest to Canadian listeners.

A new technique will be introduced in the talks on Canada to make the very pulse of the nation audible to listeners throughout the country. Mr. Walter Bowles will broadcast from a different locality each week, telling of that district's contribution to Canada's progress and interviewing "nation builders" who make that progress possible.

Yet another outstanding feature of the program will be the music—every selection will be specially arranged for the large orchestra and choir that is being used.

In sponsoring these broadcasts—be again produced by Victor George—Imperial Tobacco Company of Canada, Limited, is bringing a new experience to Canadian listeners. These Friday evening programs are live demonstration of the fact that Canadian broadcasting is equal to the challenge for something new and spectacular.

Had No Giant Boats

But Seafaring Men Were Fearless

In The Old Days

The London correspondent of the Ottawa Journal says: There has been a happy end to the sea drama of Endeavour I. Having parted her tow-ropes in an Atlantic storm, and not been seen or heard of for some days, Endeavour I was made a stunt press sensation. The morning's welcome amazed her sturdy skipper and crew.

But how strangely our views about ships and the sea have changed. Today we are appalled by the thought of a 100-ton yacht crossing the Atlantic, and maybe American yachtsmen will now modify their obsolete Cup rules.

But view by view. Is this purely to our modern obsession with great 60,000-ton liners. The Queen Mary warps our historical perspectives. Drake's Pelican, afterwards christened Golden Hind, in which nearly four centuries ago he circum-navigated the globe and was exactly the same tonnage as Endeavour I. Most of his accompanying ships were even smaller. The Elizabeth was only 80 tons. Then it was the men who were giants. Now it is the ships.

ALICE STEVENS' RECIPES

HOME MADE CANDY MAKES POPULAR CHRISTMAS GIFTS

Christmas is almost here. Times are hard and you are finding it difficult to do much Christmas shopping. Why not plan to make a number of your gifts in your own kitchen?

If you have allowed high-pressure salesmanship to commercialize your Christmas, the gift itself is what counts most. The gift itself should be inexpensive and practical, rather than expensive and useless. Christmas toys are usually wrapped away and forgotten.

Why not visit your collar shelves and buy a few of your best apple jelly? These would make very lovely gifts. When making your minicream, make a little extra and some of your friends would be very happy to receive a jar.

A box of homemade candy is very much enjoyed by every member of the family. In many cases, the ingredients used are better than the expensive ingredients of the candy.

The temperature is one of the most important parts of candy making. While a thermometer is most accurate, a little practice means that the candy water test is quite valuable. Use cold water and see the kind of ball that a few drops of the candy will make in the cold water. Fudges and maple creams need to be boiled to the soft-ball stage, while butterscotch and taffies need to be boiled to the hard-ball stage.

The humidity of the atmosphere is also important. It is harder to make good candy on a dull, cloudy day than on a bright, clear day. Boil the candy a little longer on a dull day. Have as little steam as possible in the kitchen. See that the kettle is not boiling.

Candy is very apt to be grainy. This can be avoided by adding a little corn syrup, vinegar or cream of tartar. There is a chemical change takes place in the sugar and the addition of one of these hastens the change. If the sugar does not make this change, the candy is sure to be grainy.

Do not stir the candy while boiling. The sugar should be dissolved before the candy starts to boil. Stir the sugar until it is dissolved. If crystals of sugar form on the sides of the pan during the boiling, wipe them off with a small piece of cloth tied to a fork. If the candy is covered during the first half of the boiling, these crystals are melted by the steam and there is less danger of the candy becoming sugary.

If the candy is to be beaten, as in fudges and maple creams, allow the candy to cool before starting to beat. Cool the candy, until you can hold the pan comfortably on your hand. Do not cool the candy suddenly by setting the pan in cold water.

PINOCHÉ

2 cups brown sugar
1 1/2 tablespoons butter
1/2 cup milk
1 teaspoon flavoring
Melt the butter and sugar and milk. Stir until mixture starts to boil. Boil without stirring until the mixture forms a soft ball when dropped in cold water. (This will take about 12 minutes). Cool and beat. Nuts and fruit may be added, if desired.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to: Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

A Chinese Bomber

This Is A Story Of Nerve And Hazardous Daring

The tale of the Chinese bomber deserves to pass down in history, how at dusk when the Japanese bombers were returning home, he joined the four planes and travelled along with them, his Chinese markings getting no attention in the gloom. He switched on his lights when they switched theirs and circled the airdrome along with them.

One by one the Japanese bombers landed, and when the four of them were drawn up along, with three others which were on the ground, down swoops the Chinese airman to within 500 feet and plants two bombs among them and seven perfectly good Japanese bombing planes were gone to the place where all good, or bad, bombing planes go.

Then this neat little bit of work thoroughly done, off drones the Chinese airman to his own lines. A story of nerve, initiative and hazardous daring, which deserves to live—Halifax Chronicle.

Farm Tires Show Big Increase

Nearly All Tractors Now Equipped With Rubber Tires

Attended by 115,000 farmers, over 70 tractors competed in the field at one time during the International Plowing Match held at Fergus, Ontario, from October 12 to 15. Only six tractors were on steel-tugged wheels, the remainder being rubber-tired, which reflects the tremendous growth of pneumatic tires for tractors since they were introduced at the Ottawa Match in 1930.

Outstanding in performance were the tractors on Firestone Ground Grip Tires, as they won eight out of nine of the first awards, including the grand championship, captured by Fred Timbers, of Ringwood, Ontario, for the third consecutive time.

Called A Perfect Crime

Collection Of 70,000 Banknotes Disappears From Owner's Home

London's perfect crime—the theft of the \$250,000 Avonmore collection of banknotes, untraceable in the open market—has just been discovered.

The collection of 70,000 notes, in 110 leather-bound books, vanished from the home of Frederick Ernest Saiter, 73 Grosvenor Gardens, London, when he returned to find how the thieves entered the house. There were no fingerprints, no marks on any window, and no one heard a sound.

The steel, asbestos-lined safe, six feet high and four feet broad, had been neatly forced open. It had an ordinary patent lock.

READY TO BRING
YOU RELIEF
IN MINUTES

THE REASON

"ASPIRIN" WORKS SO FAST

Drop an "Aspirin" tablet into a tumbler of water.

By the time it hits the bottom of the glass it is dissolving.

This speed of disintegration enables "Aspirin" tablets to start "taking hold" of headache and similar pain a few minutes after taking.

YOU can pay as high as you want for remedies claimed to relieve the pain of Headache, Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve—the one used by thousands of families daily—is "Aspirin".

Simply take 2 "Aspirin" tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for "Aspirin".

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

"ASPIRIN"

MADE IN CANADA

Has Proved Satisfactory

Germany Is Making Shoes And Gloves From Fish Skin

Germany's efforts toward raw material independence are brought out in an exhibition of shoes and gloves manufactured from fish skins.

The exhibition shows that the manufacture of leather from fish skins is increasing rapidly, and it is reported that highly satisfactory tests have proved the strength and durability of this leather.

Many concerns exhibit gloves and shoes of widely differing patterns. It is declared that fish leather articles will soon appear in retail trade.

Untold wealth is that which does not appear on the income tax returns.

Asbestos Suits For Pilots

Would Be Protection In Case Airplane Caught Fire

British air pilots are to fly in fireproof clothes—aluminum suits in which a man could sit in a gasoline blaze without serious injury.

Ground fire-fighting trials with heavy asbestos suits have produced the new flying type, said to be lighter than the latest flying suits now worn by R.A.F. men. The material is closely woven light asbestos cloth.

Tests have shown that a pilot wearing such a suit has time after catching fire in the air to land his aeroplane and escape. In an ordinary fabric flying suit a pilot cannot stand the heat of a real blaze in his aeroplane for more than a few seconds.

An injured man in a fireproof suit could live some time in a crashed blazing aeroplane until rescuers pulled him clear. The suit consists of an overall "teddy bear" suit, helmet, gloves and emergency visor.

The prehistoric sea lizard known as ichthyosaurus, had the largest eyes of all the creatures that ever lived. They were as large as a man's head.

More new automobiles are seen in Turkey than a year ago.

WHAT HO!

—By—
RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER I.—Continued

Lewis extended a limp hand and murmured "Howlerdo?" He had seen cinema aristocrats.

"It is an honor to welcome you to Bear Falls, your grace," said Ernest, shaking the hand.

"Much obliged," said the duke. "The duke," explained Cooke, "is here on a secret mission. Know what I mean?"

Ernest nodded.

"The duke," went on Cooke "is here to see about having the royal collection of wild animals stuffed. He heard about the good work you do, Ernest, and he thinks maybe you're the man for the job."

"That's very flattering," said Ernest.

Cooke turned to Lewis.

"How many animals will you want stuffed, duke?" he inquired.

"Several gross," answered Lewis.

"How many elephants?"

"Three."

"Tigers?"

"Four," said Lewis. "And a half dozen lions."

"Bears?"

"A pair of bears," said Lewis.

"How are you on bears, Mr. Bingley?"

"Fair," said Ernest.

"Splendid, old chap, splendid," said Lewis.

"Now, Ernest," said Cooke, "suppose you go home and figure out an estimate for stuffing and mounting three elephants, four tigers, a half dozen lions, and a pair of bears. Then send in your bid. Is that okay by you, duke?"

"Absolutely okay-deke," said the duke. "Just send the bid to me, care of the king, London."

"Hey, Sam," called the desk clerk, "your wife wants you on the phone."

"Why are wives?" grumbled Cooke, and waddled to the phone booth. Ernest watched his bulk ooze into it.

"Poor old fellow," said Ernest.

"The only fun he has is making fun of other people."

"Huh?" said Lewis, sharply.

"Oh, I don't mind his little jokes," said Ernest. "This one will make him happy for days. Please don't let him know I know. Good-day, sir."

Ernest went on his way.

Presently Cooke returned from the telephone, his portly frame shaking with chuckles.

"Some boob," he said.

"Yeah," said Lewis. "Some boob."

That evening Ernest Bingley did not pay his almost nightly visit to the public library to seek escape in his books, for choice, the Waverley novels of that other romanticist, Sir Walter Scott. He felt elbowed by an unfriendly world, and sought the seclusion of his study.

For supper he fashioned himself a shrimp omelette on a gas ring in his bath room, and having consumed it, a jar of cheese, a can of apricots and a stray, elderly cruller, he stretched himself out on his narrow bed, and lying there, contemplated a picture on the wall.

It was a photograph, cut from

NO TERRIBLE HEADACHE NOW

Found Quick, Sure Way to End Them

It's fortunate that a great Canadian doctor made the famous fruit, herb and tonic remedy.

Fruit-a-tives, Mr. C.D., Toronto, writes, "I was

latterly with very severe headaches. Pain on top of head and in forehead was more than I could bear. My doctor advised me to take Fruit-a-tives. Since then I have not had any trouble with headaches."

When you take Fruit-a-tives, your liver is cleansed. Stomach, kidneys and intestines work naturally. Poisons and wastes go. Food nourishes. Health comes. 25c. and 50c. All druggists.

FRUIT-A-TIVES LIVER TABLETS

some English sporting magazine, and it showed a noble and stately castle, complete with donjon, towers, bastion, bow-man alita, most portcullis, and ivy. The caption revealed that this was Bingley Castle, near Pennyton, in Somersetshire, the seat of the Earls of Bingley since the sixteenth century.

For a long time Ernest gazed upon this historic structure, until he fell under the spell of a species of self-hypnosis, and the pedestrian modern world dropped away, and he saw a knight in shining armor, ride up on a prancing white war-horse to the massive gate of the castle. High up on one of the towers a lovely, fair-haired maiden, in wimple and anod, stood, waving a white kerchief at the knight.

"Be of good heart, Lady Rosa," the knight called out. "By my halldom, I'll rescue you."

"I have waited for you so long, Sir Ernest, so long," said the damsel.

The mundane jangle of his telephone caused this vision abruptly to vanish from before the enchanted eyes of Ernest Bingley.

"Hello," he said.

"Mr. Bingley?" asked a brisk, managerial voice.

"Speaking."

"This is the telephone company," said the voice. "We are testing your line. Would you mind standing six feet from the phone, and whistling."

"Not at all," said Ernest, and, backing away, he whistled a few notes.

"Could you hear me?" he asked.

"No," said the voice. "Will you please try again?"

"Certainly."

"Whistle a tune this time, and whistle louder, please," directed the voice.

Ernest whistled the first four bars of "Sally in Our Alley."

"How was that?" he asked.

"Very pretty," Sir Ernest, said the voice. "Now eat a package of your bird-seed."

He heard a volley of guffaws. It was the boys at the pool room having one of their little jokes.

Ernest put down the phone with a frown. Really, he mused, was always breaking his dreaming.

He stretched himself on his bed again, and gazed at the castle, but he could not recapture the broken dream. He suddenly felt lonely, but with that even more acute loneliness of a stranger in a crowd.

Yet he was no exotic being, transplanted from foreign soil. He had always been, probably always would be a part of the town, but in the way that the appendix is part of the body, not well understood, or much wanted. He tried to understand why.

Was it his looks? He sprang up and confronted his visage in a mirror. He felt, in fairness to himself, that he did not look any funnier than most of his peers. If any one wanted to be hypercritical they might say that his nose was too long by a quarter of an inch, and had a tendency to point skyward, and a slight tuck might be taken in his ears, but otherwise, no very drastic alterations were needed to make him rather handsome than the run of Bear Fallsians.

They couldn't call him a sissy. In high school he had made the football team, and played right end with marked ferocity and some effect, considering his 140 pounds. Once he had run a mile at a track meet in 4:49 2-5 and won a silver cup that turned green with the spring.

Nor would any one call him mean, or a snob. His fellow citizens had imposed on his good nature too often to deny that he had an abundance of it. Yet he knew that they said of him that he was not a "regular fellow."

Abruptly he jumped up from his bed and out of his brooding.

"They can all go to blazes, the yahoos!" he cried. "I'll be an irregular fellow if I want to be. I'm not like them and I'm glad of it. I'm a Bingley."

He rushed to his work-bench and began, furiously, to stuff a squirrel.

That he was a Bingley was Ern-

est's chief solace in times of stress, and at most other times, as well.

It was his one inheritance from his father, a singularly futile little man who had pottered through life in an optimistic, helpless daze, piddling away his patrimony, derived from a farmer father, on schemes for transmuting corn-alk into real silk, or inventing complicated gadgets for feeding pigs or waking sound sleepers, which were either phenomenally impractical or had already been invented by somebody else. In blacker moods Ernest sometimes felt that he was just another one of his father's unsuccessful inventions. His mother remembered only dimly, as something soft, warm and gentle.

Perhaps to compensate for his own lack of luster, Bingley, senior, had turned to genealogy.

From the American Institution of Genealogy and Numismatics, located in Goose Creek, Texas, the elder Bingley had obtained, for ten dollars, a chart of the Bingley family tree, with all its roots, branches, limbs and twigs, and it now hung, with the Bingley coat-of-arms (another ten dollars) on the wall of Ernest's studio, due east of his high school diploma and another sheepskin document attesting that he had been granted the degree of M.T. (Master of Taxidermy), by the MacGrudger Correspondence University, Joplin, Missouri.

By steering a somewhat circuitous course through a net-work of nephews and uncles, Ernest arrived at the fact that he was indubitably descended from the founder of the American branch of the Bingley clan, one John Bingley, who settled near Danbury, Connecticut, in 1763, with his bride, Lucy, and remained to become an embattled farmer and take pot-shots at red-coats as a corporal in General Washington's forces. He also produced a round dozen little Bingleys, and a grandson of one of them came as a home-steader to Iowa and was responsible for Ernest's grandfather, and therefore for Ernest.

Peering into the even more remote past, a kinship could be discerned between this early John Bingley and the original and only genuine Bingleys of Bingley Castle, and they in turn could gaze proudly back through the centuries to a certain doughty Robert Bingley who was knighted by Richard the Lion Hearted for slaughtering an impressive number of Indians during a crusade. Robert, though the records are a bit fogged by the mists of time, stemmed, or so it seemed, from a Norman of the 1066 vintage, named Bienjolie or perhaps de la Bindey, and it was not doubted by Ernest that this Bienjolie (or de la Bindey) could follow a reasonably straight line back to Chaucer, and he would trace his ancestry all the way to the Garden of Eden, the apes, the primordial ooze, or to whomever or whatever he might jolly well choose.

When rapped by the rough edges of life it was Ernest's habit to say "Noblesse Oblige," count ten, and accept the situation with the grace and fortitude expected of one who bore a great name.

(To Be Continued)

High Grade Wheat Shortage

Spring Varieties Of High Protein Content Now Scarce

World shortage of high grade hard wheat, chiefly spring varieties of high protein content, is becoming increasingly apparent and being reflected in North American cash wheat markets.

Premiums on contract grades of Canadian wheat have soared on the Winnipeg Grain Exchange to an all-time high within the memory of the trade for this season of the year.

This wheat is wanted by continental countries for blending in their mill grists to maintain their flour standards as native wheats this season do not contain the necessary milling and baking strengths.

Demand has resulted in small deliveries through the clearing house and only 4,228,000 bushels have been delivered against October contracts.

Quite Simple

"Doctor, I want you to look after my office while I'm on vacation."

"But I've just graduated, doctor. I've had no experience."

"That's all right, my boy. My practice is strictly fashionable. Tell the men to play golf and ship the lady patients off to Europe."

To encourage wheat growing Costa Rica will supply the grain for sowing.

Electric railway signalling is being introduced into the Irish Free State.

Film actresses of Japan are being instructed in the handling of rifles.

No known cement will mend an amber pipe stem.

Not Dangerous To Users

Public Telephone Cannot Be Called A Disease Carrier

We confess to having a dislike to using public telephones in booths which may be used by a large number of people every day and never, apparently, disinfected. The short, funnel-shaped mouthpiece appears to be the perfect germ-trap, every person's mouth being within an inch or two of it. We, and perhaps many others, are glad to learn, therefore, that this is a misapprehension.

Over a period of eighteen months two bacteriologists, of the Long Island College of Medicine experimented with public telephones in the city of New York. After the instruments had been in use some time the mouthpieces were removed and the bacteria counted. Deadly germs were found, of course, but not in such numbers that they were dangerous to telephone users. There are more germs in the booths than on the instruments. There are more germs in a picture theatre or, say, at an election meeting, than on a telephone mouthpiece.

New York telephones to the number of 246 were studied in all parts of the city—none-too-clean barrooms, restaurants, railway stations and the modern office building occupied by the Radio Corporation of America. Some of these telephones were used 6,000 times a month; others rarely. But the bacteria on telephones used 6,000 times a month are no more numerous than on home telephones used only once or twice a day.

The public telephone, therefore, is not a disease carrier.—St. Thomas Times-Journal.

Radium Under The Sea

Sediment On Bed Of Ocean Contains Valuable Substance

Tremendous new reservoirs of radium, one of science's major weapons in combating cancer, have been found in sediment taken from ocean depths, Charles Snowdon Piggot, of the Carnegie Institute, of Washington, revealed.

Piggot is an expert in taking "cores" from as deep as three miles below the surface. The cores, ranging up to 10 feet in length, portray the historical record of the ocean.

The discovery opens new avenues for research, he said, adding that the radium concentrations are greater in those portions of the ocean more remote from lands and lying at the greatest depths.

Hints New Discovery

Danger Of Blood Clot Following Operations May Be Removed

Research at the University of Toronto within the next year or two may remove the blood clot following operations, surgery's great danger, Canon H. J. Cody, University president, told a gathering in Toronto. Canon Cody who was made a Mason at sight highest honor within the craft, told the meeting in the Masonic Temple the report of the Board of Governors would make reference to the research in its present "incipient but gratifying state."

Lord Rothschild, who died recently, left 2,000,000 butterflies and moths, a gallery of stuffed animals and a private museum to preserve them, to the Natural History Museum at Tring, England.

Little Helps For This Week

I said, I will take heed to my ways that I sin not with my tongue. Psalm 39:1.

No sinful word, nor deed of wrong.

Nor thoughts that idly rove; But simple truth be on our tongue.

And in our hearts be love.

Let us all resolve to attain the grace of silence, to deem all fault-finding, that does no good a sin, and to resolve when we are happy ourselves not to poison the atmosphere for others by calling on them to remark every disagreeable feature of their daily life, and resolve to practise the grace and virtue of praise. If we are surrounded by those who constantly exhibit defects of character and conduct, and we yield to a complaining and impatient spirit, we shall mar our own peace without having the satisfaction of benefiting others.

THIS BACKACHE IS AGONY!

KIDNEYS WILL CAUSE IT!

Sluggish kidneys let poisons accumulate in your system. Lame back, lumbago and rheumatic pains often follow. GIN PILLS will give the kidneys the help they need to filter out the poisons that cause the pain. "Purge their moorls through their ureters!"

GIN PILLS FOR THE KIDNEYS

To Build New Liner

Cunard-White Star To Carry The Name Of Mauretania

The proud old name of Mauretania will return to the North Atlantic passenger trade.

The Cunard-White Star Steamship Line announced its new 30,000-ton liner—a comparatively small craft as trans-Atlantic liners are reckoned nowadays—would be named after the famed Cunard-ordered broken up in 1935.

The new Mauretania will be launched July 28, 1938. She is expected to be in service by 1939.

The old Mauretania established her best record for the North Atlantic crossing in August, 1929, when she reached Plymouth four days, 17 hours, 49 minutes out of New York. She made her last voyage from Southampton in July, 1935.

The Indian Ocean has an area of 17,084,000 square miles, being the third largest body of water in the world. Its maximum depth is 11,136 feet.

An army officer has listed the greatest generals in history. If "greatest" means the ones who influenced the world most, don't overlook General Apathy.

Conversation is an art, but talking is a habit.

Do a favor to your friends and they will never forgive you for it.

Cut Down Food Wastage

...by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

CANADIAN OPINIONS OF THE WEEK

"We have in this country many movements that make for disunity and tend to destroy the influence of this country among the nations of the world. If we lose that influence it will be had for Canada.—Premier Mackenzie King.

"To this day I have never heard any man dare to say that relief has been administered as a political or partisan matter. Thank God that there are people in Canada who can't be intimidated in that way. I don't think the forces of public opinion will permit this thing to happen in Canada.—Mr. Hon. R. B. Bennett.

"It is a doctor's duty to eliminate fear, which is the usher that brings most persons to the doctor's waiting-room.—Sir Semour Hicks.

"While there is opportunity in our schools to learn a profession, there is no real chance to learn a trade. In reply to criticism of indifference, carelessness and inability on the part of young men to go out and get a job, I wish to say that they cannot do so in Canada because the employer wants one who is skilled. There is no scarcity of unskilled labor, but there is a shortage of skilled or trained workers.—J. F. Marsh.

"The depression is passing, and this means that economic pressure is less on the people and this in turn has its effects on crime. Crimes were on the increase for the first ten years following the Great War, but again this is now decreasing.—Dr. Eugene Binn.

"Honesty, like patriotism, is essentially an international thing. It is not confined to any one country. An honest man is honest no matter what country he may be in, while at the same time he is sure to be a patriot wherever he will find him.—Premier Maurice Duplessis.

"War is a contingency. It is a contingency just as domestic trouble is a contingency. Therefore, it is incumbent on nations to pursue such a policy as may ensure in homes, who by patient endeavor and strategy may often avoid war in the same manner as much domestic unhappiness and strife is avoided in the average intelligent family.—Dr. J. T. Brownlie.

SEDGEWICK CROWD HEARS WOODSWORTH

Sedgewick, Nov. 13.—The K. P. Hall at Sedgewick was well filled Wednesday afternoon on the occasion of the first visit to this vicinity of J. S. Woodsworth, M.P., national leader of the C.C.F. With Mr. Woodsworth were ex-M.P. William Irvine and ex-M.L.A. Chester A. Ronning of Camrose, both of whom spoke at the meeting.

Mr. Woodsworth gave a detailed outline of the present economic situation in the dominion and referred to instances of unfair conditions under which farmers and laborers exist at the present time.

ANNOUNCEMENT

ENGLISH—MEAKINS

Mr. and Mrs. R. F. Meakins of Jar-
row, Alberta, announce the marriage
of their youngest daughter, Gladys
Victoria May, to John William En-
glish of Vermilion, on October 19th,
1937, from St. Saviour's church, Ver-
milion, Canon Leveridge officiating.
Mr. and Mrs. John W. English will
make their home at Vermilion.

Minutes of Monthly Meeting of M. D. Kinsella, No. 424

Minutes of meeting held at Kinsella
on November 9, 1937, at 10 a.m.
Full Council present.

Cr. Candy that minutes of the pre-
ceding meeting be passed as read. c.u.

Cr. Lisson that the statement of
receipts and expenditures for month
of October be passed as read. c.u.

Cr. Zelinski that sec'y write to all
persons who received seed grain in
1937 and who have not yet repaid
same, that unless same is paid with-
in 10 days from the date of the letter
that action will be taken at once to
recover same. c.u.

Cr. Bowden that the offer of Messrs.
Wiese Bros. to purchase N. W.
28-46-12, w. 4th, be accepted and sec'y
submit same to the Dept. of Mun. Af-
fairs for approval. c.u.

Cr. Bradley that sec'y insert in the
newspapers instructions that have
been received from Dept. of Mun. Af-
fairs in connection with relief, viz.
that all persons who receive relief
must work out same before any fur-
ther relief is given. c.u.

Cr. Candy that the application for
relief made by Wm. Hobson, Loug-
heed, be not approved. C.U.

Cr. Overbo that the application for
relief made by R. Stevens of Kinsella
be approved on the condition that
Mr. Stevens repays his seed grain ad-
vance in full, the relief to consist of
8 sets of underclothing, 4 pairs of
boots, 4 shirts and 3 coats. c.u.

The following correspondence was
read and tabled for the action of
the sec'y: St. Anne hospital, re a/c;
C. G. Purvis, re Viking hospital; Un-
iversity hospital, re a/c; P. Larson,
re taxes; Dept. of Mun. Affairs, re
distribution of apples, etc.; Dept. re
unemployment relief plan; Viking
hospital, re Ed. Whitford, B. Bing-
ham; Bank of Commerce, re seed
grain a/c; N. Onychuck, re taxes;
M. Wilkinson, re seed grain; Old Age
Pensions Board, re Mrs. Hart; Vik-
ing hospital, re L. Mark; Miss Twee-
dy, re Millar.

Cr. Lisson that the following bills
be passed for payment:

A Remembrance day service, in
commemoration of the signing of the
armistice, November 11th, 1918, and
those who fell in the Great war, was
held in the Elks hall last Thursday
at 2.30 p.m. The service opened with
the singing of O Canada, followed by
prayer by Rev. Mr. Anderson, pastor
of the Anglican church. The hymn,
"O God Our Help in Ages Past" was
sung after which the two-minute sil-
ence for those who made the sup-
reme sacrifice was observed. Two
veterans deposited a wreath on an
altar near the platform after which
the "Last Post" was sounded by Dav-
id Cary. The congregation joined in
the hymn, "O Valiant Hearts." Mrs.
S. Lefsrud sang a solo.

Seated on the platform was Rev.
Fr. O'Neill, Rev. Dr. Scott and Rev.
Anderson.

The memorial address was ably de-
livered by Mr. Anderson, who recalled
the days of the war, and the armistice
which ended the four years world
war. The Rev. Anderson
pointed out that during peace
we have to fight and strive to
keep peace. It was an eternal struggle.
He felt that the best way for
nations to keep peace, those nations
at least who wanted peace, was to be
well armed. While the league of na-
tions had not functioned as thor-
oughly as might have been done, it was
the only tribunal where nations gath-
ered to discuss mutual problems and
avert war if possible. The thoughts
of peace should first be in the hearts
of the people, then governments and
nations would fall in line. We should
live up to those principles for which
the honored dead fought, and died,
otherwise their sacrifice would be in
vain. Mr. Anderson concluded his
thought-provoking address by recit-
ing the immortal poem, "In Flanders
Fields". The service ended with a
hymn and the national anthem.

The Viking Legion members, their
wives and sweethearts gathered in
the dining room of the Viking hotel
on Thursday evening, November 11,
for their annual banquet. At 8.30
they marched into the dining room
singing the songs that were so popu-
lar during the war. Before being
seated the two-minute silence for ab-
sent and fallen comrades was observ-
ed by all standing with bowed heads.
Then on came the meal with turkey
and all the trimmings. The banquet
fair was very informal, toastmaster
Cde. Clinton calling for short im-
promptu speeches while everybody
was enjoying the excellent food. Cde.
Thunell extended greetings and wel-
come from the town; President Cde.
R. Dann spoke of the importance of
the work of the Legion, and many
others related humorous incidents and
stories of the war. Mrs. Priest pre-
sided at the piano for the singing.
Vocal numbers highly enjoyed were
given by Mrs. Detmold, Cde. Boyd
Gray and Capt. Logan. Games, songs
and a social hour followed the ban-
quet which everyone voted the best
yet. Several members and their
wives were in attendance from Kin-
sella.

A blanket of snow covered this
district over the week-end and win-
try weather has set in throughout
the province. The temperature is
keeping above zero. Roads which were
blocked by the drifting snow and
made difficult for motor travel are
opening up. Indications are that it
will be a "white" winter.

Mr. and Mrs. Archie Heffel and
son, Kenneth, motored over from Vik-
ing to spend the week-end in Alliance
with relatives and friends.—Alliance
Times.

Jas. A. Craig, J. Reihus, J. Smith
and H. Empey, of Lakeview W. M. D.,
are attending the municipal districts
convention being held in Edmonton
this week.

W. H. Empey and H. Rollans were
delegates from the Viking hospital
board at the hospital districts con-
vention held in Edmonton on Monday
and Tuesday.

Wm. Revill left last week for the
Old Country for an extended visit
with relatives and friends. He sailed
on the "Queen Mary" from New York.

Syd Stowe, who was taken to the
local hospital last week for medical
treatment is reported to be making
steady progress towards recovery.

Percy Main was taken quite seri-
ously ill last Wednesday, but is re-
ported as improving gradually at his
home just north-west of town.

Mrs. Robt. Montgomery, of Fort
Saskatchewan, spent the week-end
at the home of her parents here, Mr.
and Mrs. J. E. Ash.

Mrs. J. L. Dodds left this evening
for Holden to be the guest of Mrs.
Farrell before returning home to
Stettler.

Mrs. Wm. Revill and daughter left
this week for California where they
will spend the winter months.
Mr. Ed. Whitlam, of Vancouver,
was a guest at the home of Mr. and
Mrs. C. G. Purvis over the week-end.
Misses Mary Hoskins and Genevieve
Hennessy were down from Edmonton
over the week-end.

An Acknowledgement

The Company's elevators continue to receive
a gratifying measure of patronage, not only from
shareholders, but also from thousands of other
farmer customers. It is such support which in the
past has provided the basis for the success of the
Company and which it must be the continued en-
deavor of the Company to merit.

In these words, in the last annual report, the
Directors of United Grain Growers Limited ac-
knowledge the loyal support of the Company's
patrons.

BEHIND THE HEADLINES AT OTTAWA

(By Dean Wilson)

The recent dramatic collapse of the stock markets throughout Canada has shown to Ottawa that the man on the street in this country does not realize that there is a direct relationship between Wall Street and the Canadian bond markets, and also between these business indicators and the general economic and industrial life of this Dominion.

The vast majority of the people of Canada are not interested in Wall Street or any other stock market, for one reason or another but mainly because they are not investors therein. Yet, it is a fact that a collapse on these markets may have extremely serious reactions in the business life of the land as was witnessed in the famous crash of 1929 which inaugurated the depression that is regarded by some well-known economists as the worst in the history of this country.

Now the question is raised by everyone whether the recent market crash and the present nervous state of these enterprises is not really an indication that this Dominion is on the threshold of another great economic depression, and this is a problem which has divided the experts into two distinct camps. One group is very optimistic over the whole matter, while the other is extremely pessimistic.

The optimistic experts state that the depression which started with the big crash of the stock markets in 1929 is slowly but surely releasing its hold on business in this country and since 1934 Canada is on its way to recovery. But a large group of pessimistic experts are clamouring that only artificial recovery has taken place here in the last couple of years, mainly through the revival of business caused by governmental public works and through the demand for materials that are needed for war preparations throughout the world, but that the depression which started in 1929 has never passed out of the picture. Therefore, everything boils down to one question: Is Canada on the threshold of another great depression? Business leaders throughout the land answer in a mixed chorus of loud and excited voices, yes and no.

Statistics indicate that actual business, finance and industry are but slowly improving since 1929, with no marked recession, save the present collapse in the stock markets, and the fundamental background of Canadian enterprises is sound and secure, which pictures the whole situation in an entirely different light than the one which described the pre-depression life of the country in the "boom" days before 1929. Even at the beginning of the current year there was an actual scarcity of certain commodities in this Dominion and consequently, many factories and businesses showed evidence of feeling secure. Steel plants had to work overtime to supply the demands for their products. Canadian pulp and paper mills obtained better prices for their products. Mining enterprises saw actual prosperity in their ranks, and there was a great demand for Canadian products from all nations of the world who wanted nickel, copper and other metals which were necessary for the manufacture of ammunition and war equipments. Canada was shipping enormous quantities of these materials in which this country was very rich, and then again, the Canadian government used these articles in order to induce various nations to enter into trade agreements with this young country for the purposes of sending other Canadian products abroad.

That was the basic position of the economic life of this Dominion at the beginning of the current year.

However, during the last spring season a sudden crash took place on the stock markets and soon a nervous tension overtook business in Canada. Steel plants were forced to slow down. Pulp and paper operations were curtailed because there was a fear of over-production. Likewise, retrenchment was seen in many Canadian enterprises. It was actually the beginning of the present market crisis.

Many reasons have been advanced for this tense situation. One group of expert opinion attributes everything to labor troubles and strikes. They assert that the rivalry between the C. I. O. and the American Federation of Labor have brought a constant shortening of the hours of work and a continual rise in wage scales, but it is a fact that when men earn more, they are inclined to spend more, and prices rise. However, investors or shareholders believe that dividends will be much smaller in the future and hence the rush to dispose of their holdings. Another group of experts figures that there are too many taxes, too many laws and restrictions on private enterprises which endanger the normal and healthy course of a nation's business. A third school

of economic thought attributes everything to a world in which there is a constant threat of war on the international scene and this fact renders all big business at a standstill position or uncertain state, although they know that it is this very fear of war which brought much activity to Canada's business world since enormous quantities of merchandise have been shipped to nations who are preparing for an eventuality on the international scene. However, the true explanation is that business for professional speculators has been very poor all summer and the fall found many in a position where they could hold out no longer, with the result that they dumped their stocks on the market. Naturally, the man on the street became panic-stricken; when there are more vendors than purchasers it is usually the case and the little speculator loses all sense of reasoning or logic under such circumstances.

Most of the rash statements that have found their way into print are without any foundation, according to the highest officials in Ottawa, but a few factors have contributed to this nervous position of Canadian business. It is true that there is a certain amount of temporary inactivity in basic industries, especially since the beginning of the fall season. Business which caters to luxury is slow. The far Eastern conflict has affected adversely the export trade of Canada. The automobile trade, railway and its accessory enterprises, and building inactivity, are all slackened to a certain extent. But in general there is no basic or fundamental reason to believe that the present stock market crash is due to bad business, though it is quite likely that bad business may result from this nervous and strained stock market.

Alberta Youth Congress Meets in Calgary, November 20 and 21

In Western Canada College Auditorium

The value of united effort on the part of young people throughout Canada is being increasingly demonstrated by the various youth re-establishment schemes which are being very successfully initiated and meeting with a very ready response from many parts of Alberta. Great interest is being shown on all sides, and Mr. J. H. Ross, Alberta Director of the plans, and Mr. Ian Eisenhardt, Superintendent of Provincial Recreational Centres in British Columbia, will thoroughly discuss and explain the value of youth re-establishment. International problems as they affect youth will also be dealt with, as well as provision made for recreation and worship.

It is not perhaps so well-known that the sum of a million dollars appropriated for youth rehabilitation at the spring session of the House of Commons was obtained largely through the efforts of three young M. P.'s, members of the Youth Congress, Denton Massey, Paul Martin and T. C. Douglas, who were able to focus the attention of the government on youth problems.

The Calgary, Edmonton and Lethbridge youth councils are co-operating closely with government and private agencies for the efficient administration of these plans. At the Alberta Youth Congress, held at the Calgary on November 20 and 21, Mr. J. H. Ross, Alberta Director of the plans, and Mr. Ian Eisenhardt, Superintendent of Provincial Recreational Centres in British Columbia, will thoroughly discuss and explain the value of youth re-establishment. International problems as they affect youth will also be dealt with, as well as provision made for recreation and worship.

It is not too much to say that the continuation of these fine projects depends in a very real sense on the interest shown by young people themselves. Young people's organizations in all communities are therefore urged to send delegates to the Alberta Youth Congress. The Congress is all inclusive and recognizes your contribution and assistance for the fulfillment of its work. Delegates' fees will not be over \$1.00 and five delegates are allowed from each group.

Further information will be gladly given to all inquiries addressed to G. A. Gillander, Secretary, Provincial Committee, Alberta Youth Congress, C/o Y.W.C.A., Calgary, Alberta.

Gardiner Is In No Hurry On Candidates

Vulcan, Alberta, Nov. 19.—Robert Gardiner, president of the United Farmers of Alberta, doesn't believe haste is necessary in naming candidates for the next provincial election. At a district U.F.A. convention here Mr. Gardiner expressed the belief the Alberta government would continue in office its full term until 1940.

The World of Wheat

By H. G. L. Strange, Director, Research Department, Searle Grain Co., Ltd.

"By selfish and short-sighted husbandry prairie farmers have mined their land and ruined their soil."

"Great Britain, therefore, can no longer rely upon Western Canada to supply her with foodstuffs; consequently, by means of tariffs and quotas, British farmers must be protected and encouraged to increase their home production of wheat and other foods."

These are studied statements that have been made recently over and over again by Mr. A. G. Street, former homesteader, noted English farmer and distinguished writer of novels on agricultural subjects. Mr. Street's articles appeared in the "Financial Post" of Toronto, and in the "London Daily Telegraph"; they were broadcast by radio over Great Britain and then published in the "Listener", the British Broadcasting Corporation's journal.

I for one regard Mr. Street's statements as a definite libel on Western Canada, and on our prairie farmers. The statements are simply untrue. Our farmers are not soil miners; they are not ruining the land; they are good husbandmen.

Careful investigations made into rainfall and yields by the Research Department of the Searle Grain Co. indicate clearly that whenever our prairies enjoy good rains, then do our fields once again become fertile, and yield up bountiful crops.

The following factors have tended to raise prices: Wet weather threatens early Australian harvest; U. S. makes corn loans; Wheat imports; Moisture reserve very deficient in much of Kansas; Spain obtains Italian wheat; Oklahoma pecan crop badly damaged by worms.

The following factors have tended to lower prices: Harvest commences in Argentina; Tentative Australian wheat estimate 163 million; Rains benefit growing crops in Argentina; U. S. win wheat acreage practically the same as last year's large acreage; Critical industrial situation in the United States; Australian shipments continue on a liberal scale; Almond crop for 1937 largest ever produced in California.

APPROPRIATION.

The Jarow Masonic Lodge wish to thank the many friends who so kindly donated to the car of vegetables which was sent to a dried out district. W. B. Victory Lodge No. 112, Jarow, Alberta.

OIL NEWS

Half truths and wrong conclusions, reply representatives of the oil industry in answer to claims of the head of a well-known financial agency who recently claimed that fuel oil prices in a certain territory had been controlled by a conspiracy.

In his article he claimed that with a recent advance in price, fuel oil had been lifted 27 percent in three years.

The reply was that his views, as he expressed them, gave an entirely erroneous survey of conditions in the oil industry.

To keep the record straight the oil industry turned to the United States government record for May which showed that commodities covered in the general classification of "fuel and lighting" are 77.2 percent of the 1926 index of 100. All commodities are given a rating of 7.4. The index for the above price of petroleum products is only 60.9 percent of the 1926 figure, the lowest of all industrial products listed.

Bituminous coal, which was mentioned in the article, is 98.5 and anthracite coal 74.2. Gas and electricity with both of which comparisons were made unfavorably to oil, are actually in excess of 80.—Cont.

Thos. G. Dark, eyeglass specialist and licensed optometrist, will be at Irma Drug Store, Friday morning, 9 to 12; Kinsella, 12.30 to 1.30; Viking Drug Store after 2 p.m., December 3, for the practice of his profession. Dark's glasses will relieve eye strain, strengthen your sight and save your eyes. Special attention given to children's eyes. Don't forget the date—Friday, December 3rd.

"Give me a kiss and you shall have a nice new penny," said an old maid to her little nephew while visiting at his home here. "No, that's not enough," the practical boy replied, "I get more than that for taking care of you."

Opportunity — they do me wrong who say I come no more, when once I knock and find to my joy; for every day I stand outside your door, and bid you wake, and rise to fight and win.

DR. CAMPBELL IS CANDIDATE IN LETHBRIDGE

Lethbridge, Nov. 13.—Dr. Peter M. Campbell was unanimously chosen as a candidate for the Lethbridge provincial election December 2, at a nominating convention last night attended by United Farmers of Alberta, Liberal, Conservative and People's League representatives.

The by-election was called because of the resignation of Hans E. Wight, Social Credit.

Dr. Campbell, a practising physician in Southern Alberta for 37 years, will run on a platform opposing all Social Credit legislation and to support all efforts to preserve to the people of Alberta their traditional rights of free speech, freedom of the press and access to the courts.

SOCIAL CREDIT EXPERT SENTENCED TO SIX MONTHS HARD LABOR

G. F. Powell, hired by the Alberta government as "expert" and adviser to the government on social credit legislation, was sentenced on Monday by Mr. Justice Ives to six months hard labor in Fort Saskatchewan gaol, with recommendation of deportation from Canada after serving the sentence. An appeal against the verdict has been made.

In giving sentence Mr. Justice Ives said the following to the prisoner:

"It has always been my view and I think the view of most men of thought that the most solid foundation in a state for social progress, contentment of the people, is a law abiding population. The signs have not been lacking recently in this province that there is a growing turmoil among the people and a growing disrespect for law. The next phase logical to follow with this is one of turbulence. Then you may look for breaches of the peace."

The evidence in this case has clearly shown that you are in part responsible for this condition of turmoil. It has been aroused by propaganda such as has been exhibited here in the shape of pamphlets in this court room. It has descended to where it has finally become defamatory libel. It would seem to me that when you describe yourself as a technician that it is a misnomer. It would seem to me that you are a propagandist and nothing more. The character of the propaganda as far as the evidence here has disclosed is something, which in my opinion, as a judge of this court, we can very well do without.

The sentence of the court is that you be committed to the provincial gaol at Fort Saskatchewan for a period of six months with hard labor. I shall also recommend to the Secretary of State for Canada that you be deported."

The conviction followed a trial in connection with publishing a pamphlet entitled "Bankers' Ties" in which defamatory libel was claimed by nine prominent Edmonton citizens.

Quite True Even Today.

(From The Viking News)

The author of the following words can hardly be accused of having an axe to grind in the present situation for he has been dead nearly 90 years. Yet his words ring peculiarly true today as we see irremediable agitators fomenting riots, strikes and law-breaking and disrespect for law and order. That man wrote:

"There are persons who constantly clamor. They complain of oppression, speculation and the pernicious influence of accumulated wealth. They cry loudly against all banks and corporations and all means by which small capitalists become united in order to produce important and beneficial results."

"They carry on mad hostility against all established institutions. They would choke the fountain of industry and dry all streams. In a country of unbounded liberty, they clamor against oppression. In a country where property is more evenly divided than anywhere else, they demand the air shouting alien doctrines. In a country where wages of labor are high beyond parallel, they would teach the laborer he is but an oppressed slave."

"What can such men want? What do they mean? They can want nothing but to enjoy the fruits of the other man's labor. They can mean nothing but disturbance and disorder the diffusion of corrupt principles and the destruction of the moral sentiments and moral habits of society."

Yes, the man who wrote this has been dead nearly 90 years. He was the great Daniel Webster.

A Scotchman prefers blondes, says a careful observer, because of the light overhead.

Sports of All Sorts.

Calgary took its loss of the Western football title very seriously. "There were tears in the eyes of the coach". No game is worth a host if there is no will-to-win. If the whole team from the "Footballs Town" went on the field with the spirit of the coach, the game was worth seeing.

In attempting to break the one-mile speed record on the Utah Flats the giant automobile has to cover a course of some ten miles. It requires four miles to attain highest speed and as much to come to a stop. Perhaps a tire will last that ten miles and then again perhaps not. The tire maker does some fine figuring and guarantees his product to stand a speed of 300 miles for fifteen seconds. It sounds foolish, but indicates application of science to a fine degree.

The exhibition game of golf between Babe Ruth and Babe Didrikson as partners against John Montague and Mrs. A. Amenberg turned out to be more than a big charity affair. Ten thousand fans ran riot in their desire to see at close range. The women with their high heels tore the lovely greens to pieces. The match was busted when half through, by excited fans grabbing the balls, and generally going berserk. There was \$10,000 for the "charity fund" but the club is still figuring the loss in damages to the greens.

The Big League hockey boys are creating plenty of excitement not only in the cities "down East" but in most radios in this part of the world. By using the eyes of the man "in the gondola" we are able to follow the puck nicely and view the battle from a safe and comfortable distance. The radio has made a vast hockey audience.

The German bicycle riders have won the last six 6-day races, proving that they have the real championship stuff. Our Canadian boys, the Peden brothers of Victoria, were able to equal the Germans in mileage, 2,400 miles 9 days, but could not count as many "points" in the last race at Chicago. It must be a great game to pedal hour after hour, day and night, in shifts, round and round a small track, riding nowhere, yet in six days cover a distance equal to one-tenth of the earth's circumference. Probably it's money that makes the legs do it.

Soup A Few Noodles by Tun

I sneezed a sneeze into the air; It fell to the ground, I know not where. But hard and cold were the looks of those In whose vicinity I sneeze.

"I'm a self-made man."

"You're lucky. I'm the revised word of a wife and three daughters."

Heard at the school house: Chemistry Instructor—"I would like a preparation of phenylisocyanate."

Student—"Do you mean prepared mustard oil?"

Instructor—"Yes, I can never think of that name."

It is a queer notion that the way to help workers is to tax employers so much they will have less with which to pay labor.

It takes a thousand nuts or more to hold an automobile together, but only one to spread it all over the landscape.

Wealth is not his that has it, but his that enjoys it.

It is well to remember that we are not paid for having brains, but for using them.

The one-ring circus was visiting a town in the hills. The folks there recognized all the instruments of the band except the slide trombone. One old settler watched the player, for quite some time, then said: "There's a trick to it; he ain't really swallowin' it."

Wheat Pool to Meet Nov. 23

Calgary, Nov. 15.—Annual meeting of the Alberta Wheat Pool will be held in Calgary November 23 it was announced at the head office here today. Proposals for the Union of the United Grain Growers' Limited and Western Wheat Pools, crop insurance, and a plan to change directors' terms of office from one to two years, will be discussed.

J. H. UNWIN, SOCIAL CREDIT M.L.A., THREE MONTHS' SENTENCE

J. H. Unwin, social credit member of the Alberta legislature for Edson constituency, was sentenced to three months hard labor in Fort Saskatchewan gaol by Mr. Justice Ives last Friday, following a conviction for publishing a defamatory libel, "well knowing it to be false." The action was based on the now famous "Bankers' Ties" pamphlet, which was circulated in the legislature and in other places.

The Justice in pronouncing sentence had the following to say to the prisoner:

"You have reached a mile post in your career, and I would say this is a point when you should stop and do a little personal stock-taking."

"Now, when the voters of Edson elected you as their representative to the Legislative Assembly of Alberta, they conferred on you the highest honor that was in their power to do—a position of trust; and in return to them and to the people of the province, you owe the very best public service that you are capable of giving."

"The taxpayers of this province cannot afford to waste any money. They are paying you \$1300 a year for public service, to indemnify you for your loss of time with which you devote to their service. Now, surely you cannot square this conduct that has been disclosed in your trial, by the discharge of that great duty of public service."

"Think it over! I am bearing in mind very strongly the recommendation of the jury. The maximum penalty of the offense which they have found you guilty of is, as you know, two years and \$400 fine. The sentence of the court is; upon the first count, that you be imprisoned at hard labor at the provincial jail at Fort Saskatchewan for three months, and there is no sentence on the second count."

"What are you doing with all of my old love letters piled on the table there?" asked a newlywed of his wife as he sat down to breakfast the other day. "Didn't you say you wanted mush for breakfast?" his wife asked.

BY THE WAY

Always open canned fruits an hour before serving. Fruits become richer in flavor after they have absorbed oxygen.

A teaspoonful of vinegar added to the water in which fish is boiled will help to make it firm and white. When lemons become dry, immerse them in cold water for an hour or two.

To wash rice before cooking, put it in a strainer and pour cold water over it. Wash until the water is clear.

An omelet in which six eggs are used will be much lighter if three-fourths of a teaspoon of cream of tartar is used in preparing it.

To fringe celery, cut the celery into two long lengths. Cut narrow strips in each stalk within a quarter of an inch from the centre. Put into ice water to which a slice of lemon has been added and let stand until the ends are curled.

When you wish to make gravy or soup with the water in which meat has been cooked, wring cloth out in cold water and strain the liquor thru it. No grease will go through.

When a cold strikes . . .
don't take needless risks

Treat Colds This PROVED Way

WHY experiment? Vicks VapoRub has been doubly proved for you . . . proved by everyday use in more homes than any other medicine of its kind; further proved by the largest clinical tests ever made on colds. (See full details in each VapoRub package.)

Only Vicks give the direct external treatment. No "dosage"—no risk of stomach upset.

Simply massage it on the throat, chest, and back (as illustrated). Relief starts almost at once. You begin to feel warm and comfort-

able as VapoRub starts working directly through the skin as well as by the vapors—released by the warmth of the body—are carried direct to the irritated air-passages with every breath.

This double action loosens phlegm—relieves irritation and coughing—helps break local congestion.

Repeat treatment at bedtime. After restful sleep comes VapoRub keeps right on working, hour after hour.

Of the worst of the cold is over.

VICKS
VAPORUB

Now WHITE-STAINLESS

Freedom With Tolerance

Those much cherished and dearly bought attributes of democracy, freedom of thought and freedom of speech, will be imperilled as long as they are accompanied by sincere and earnest efforts to practise the responsibilities and reasonable restraint which the enjoyment of these privileges entails.

The duty of preserving these rights which the people of this country enjoy in such large measure devolves not only upon the individual but upon all who have the direction of the channels employed to give expression to human thought and action—the press, the school, the theatre, the radio, the meeting place and even the home.

As long as these media of expression have full cognizance of their responsibility for the maintenance of free thought and free speech and exercise that responsibility in a proper spirit of tolerance and restraint, the privilege of free thought and free speech will remain a right to be enjoyed. If not, the danger arises that these rights will become a privilege only and the privilege of the few.

Undoubtedly Sir Edward Beatty had something of the kind in mind recently when, addressing convocation at McGill University, he appealed for freedom of thought and freedom of speech "but within the limits of accurate knowledge, sound logic, a sense of responsibility and the ordinary amenities of public life in a civilized community."

While Sir Edward Beatty, at the time, was applying the general principles he was enunciating, to the universities as leaders of thought in the communities they serve, the admonition he was conveying has a much broader application, for while these institutions of learning, exert a strong influence on present and future trends of thought and utterance, so also have these other agencies to which reference has already been made.

In fact, it might perhaps be urged, with little fear of contradiction, that some of them and particularly the radio and the press, exert a much greater influence on the calibre of citizenship of the present day and the future and, hence, on the government that will guide the destinies of the country, than do the universities.

The reason for such a statement is not far to seek, for the newspapers and the radio are presenting viewpoints day in and day out the year round to a vast audience of all ages and of all classes, whereas direct contact of the universities is limited to youth for brief periods of three or four or five years, and within those periods for only a portion of the year, and their direct influence is further confined to a class of youth whose parents can afford the fees of a college education or who are sufficiently ambitious to find the wherewithal for the expense from their own efforts.

Hence, if the responsibility imposed on the universities to safeguard democratic rights, including free thought and free speech is great, how much greater is the responsibility of the radio and the press.

To date little or no grounded complaint has been heard that radio has not lived up to its obligations in this respect and it is to be hoped and expected that the recently-organized Canadian Broadcasting Commission will keep this objective in mind, that is that while free expression of opinion broadcast in the form of speeches through the ether is highly desirable, so also is the use of restraint and the exercise of a spirit of toleration, whether the topic be political, religious, social or economic.

The same obligation, including that of respect for the opinions or minorities, rests squarely on the shoulders of the press of the country, both daily and weekly, and as long as these organs of opinion fulfil this trust there is little likelihood of the people of this country acquiescing in attempts to muzzle the newspapers or dictate their policies.

It has often been said that a free press is the bulwark of democracy and so it is. It will continue to occupy the proud post of defender of the democratic faith as long as it continues to exercise moderation, tolerance and respect for the rights of others.

Almost without exception the weekly newspapers of Western Canada have a fine record in this respect and that is the reason they exert a profound influence in the communities which they serve. There is no reason to suppose that in the future they will not continue to carry the torch of democratic freedom and perpetuate the fine example they are giving to the press in countries which are not so fortunate as the Canadian west.

From time to time highly deserved tributes have been paid by those in authority and others, to the independent but tolerant spirit reflected in the columns of the weekly newspapers of the prairie provinces. In doing their duty in assisting to uphold the fundamentals of democracy the weekly newspapers have set a high standard and are doing much to foster and maintain a high standard of citizenship and to fortify their own position in the hearts and minds of the people.

Toughest Carpets Ever Made

Glasgow Is Supplying Two For London Picture House

Glasgow is of Holly London with two of the toughest carpets ever made. They will be received next week by a super-cinema near Piccadilly. Both carpets are rosepink, with deep purple patterns, and have been woven about 38 to 40 feet square to stretch from vestibule to lounge.

One carpet will be laid over the other so that some of the labor of changing may be avoided. Another reason for this is that while the top carpet is away being repaired the second can act as understudy. All this is necessary, because patrons of screen art tread cigarette-ends into the floor coverings at the rate of 20 a day. And a percentage of these stubs burn deep holes.

The most difficult thing for a young mother to learn is that other people have perfect children, too.

The longest railway run in the world is from Riga to Vladivostok, a distance of 6,800 miles.

Books published in Germany in the last year include 10,000 new editions.

Did Not Enjoy Ride

Man Who "Rode Rods" On Trailer Had Complaint

F. Logan Thomason, of Hollywood, announced he had found probably the first hobo to "ride the rods" of a trailer. When the Thomason super-trailer struck a hole at the city limits, the driver got out to check for damage and a begrimed man crawled off a board on the dual axle. The man said he had held on all the way from Cincinnati, and was rather uncomplimentary about the mountain roads and the speed of Mr. Thomason's six-cylinder automobile.

Would Take Long Time

Tourists who are anxious to cover a lot of territory in a few days will be interested in knowing that a motorist driving 45 miles an hour steadily for 10 hours a day would require 13 years, 10 months and 21 days to travel over all the improved roads of the United States. So it can't be done on one vacation, after all.

The trend to window boxes on trailers will in time evolve a back-seat type that says, "John, I believe the petunias would do better in Tennessee."

New Material For Shoes

Australia Is Going To Use Skin Of Reef Eels

A unique industry is now being started along the Great Barrier Reef, Queensland, Australia, the 200-mile-long buttress of this island continent against the bluster of the Pacific Ocean. This is fishing for the reef eels. Abounding there, they will be used solely for their skin, which will be used to help out the war-torn shoes of women. Extensive researches by the Australian government have proved that skins of reef eels can be made into a soft and extremely durable leather, and factories are being established to manufacture them into women's shoes.

The reef eel is the fiercest fighter of the Pacific. The shark is no match for it, and a diver would unhesitatingly choose to fight the shark instead of the eel if he were forced to do so.

It takes a killer whale's bulk to subdue the reef eel, which, known to science as *Rhabdura macrura*, inhabits the waters about the Great Barrier Reef and is found only in tropical and subtropical latitudes.

The largest eel yet caught measured almost thirteen feet and is preserved in the Brisbane Museum. Fearless, alert, swift, remarkably pugnacious, this "doh-deb-dee snake" of the natives may well have been the original of some of the more fearsome of sea serpent legends. Its greater swiftness is the undoing of its enemies, and it is amazingly equipped with teeth, which stud the roof of its mouth as well as its jaws.

Still In Its Infancy

Television Pictures Seen In New York Were Blurred

Television pictures broadcast from the National Broadcasting Company's transmitter atop the Empire State Building were flashed across fifteen city blocks to be projected on a 3-by-4-foot screen to entertain members of the Society of Motion Picture Engineers assembled at Radio City.

For the first time in New York home-movie-size "teletypes" were publicly demonstrated on the enlarged screen. They were made possible by a projection tube developed by R. E. Lay of the R. C. A. Manufacturing Company. Up to now the 7-by-10-inch radio image has been the general standard.

The large picture was viewed in a dark room. The image was foggy and the sound was indistinct compared with a 7-by-10-inch talking picture, also demonstrated.

Veteran motion picture engineers commented as they watched a pianist perform on the large screen, that "television is still in its infancy." They saw the need for much simplification of the apparatus, which at the current state of development is too cumbersome for the parlor, looking more like an electric furnace than a radio receiving set.

Condemned as dangerous, the famous "King's Oak" in Tilford, England, has been reprieved. The great tree, said to be mentioned in Domesday Book, will be made safe by experts.

Civilized man has now progressed so far he has little to fear except disease germs and civilized man.

It has been estimated that American surgeons perform 1,000,000 operations a year.

There's always a lie between father and son but the son usually wears it.

HE WAS ALWAYS TIRED AND ILL

Three Complaints Gave Him a Miserable Time

Suffering from three complaints—disordered kidneys, sciatica, and rheumatism, how could this man be anything else but always tired and ill?

"Up to a month or so ago, I had suffered continually from kidney disease, sciatica, rheumatism, and generally felt off colour. I was constantly tired, and under medical supervision. I tried many remedies, but without effect until I gave Kruschen Salts a trial. In four weeks, Kruschen has brought about a complete transformation. I have a healthy appetite and once more feel that it is good to be alive."

The kidneys are the filters of the human machine. If they become sluggish, impurities and their way into the blood-stream, and the seed of half-a-dozen common ailments is sown.

The scientific combination of salts in Kruschen quickly coaxes the kidneys back to healthy, normal action. Soon your ailments are relieved and life becomes a joy again.

For Emergency Use

Every House In Britain To Have Six Months' Food Supply

Every house in Britain is to have its food dump, consisting of six months' "iron rations" for emergency use in the event of another war. Householders are to be given the option of purchasing specially-prepared parcels of imperishable food-stuffs at prices ranging from £5 to £10, according to quantity.

It will be possible to add to the cheaper parcels until the war dump is sufficient to feed a family of five or more for a maximum of six months.

For those unable to afford cash, hire purchase terms will be arranged by the finance houses. It is estimated that within two years 5,000,000 families will have food reserves tucked away at home.

An average of £30, according to the experts of the Empire Movement, which is sponsoring the scheme, will be spent by each of the 5,000,000 families.

For those unable to afford cash, hire purchase terms will be arranged by the finance houses. It is estimated that within two years 5,000,000 families will have food reserves tucked away at home.

The Empire Movement, probably the most powerful patriotic body in the Empire, has very substantial backing in both Houses of Parliament and has a country-wide organization capable of taking the food dump plan into every town and village.

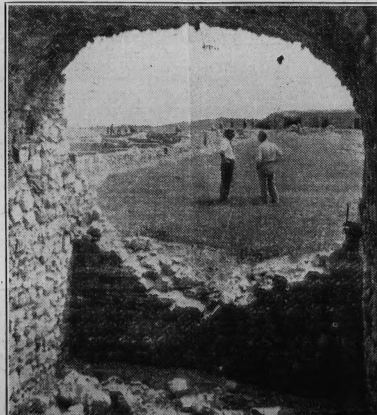

Canada's Position

Should Co-operate With Great Britain And The Empire

Where do we go from here? Some would have us play "Mary, Mary, Quite Contrary" and make faces at Mother Britannia merely to show that Canada is a grown-up, independent girl. Others, with more realism, see that good sense no less than sentiment requires that we co-operate with Great Britain and the Commonwealth.

And the overwhelming majority of Canadian, French-speaking or English-speaking, desire that co-operation with the free institutions of the Empire. Of course, Canada comes first, but loyalty to Canada does not require that the Empire should always come a bad last. The same policy for Canada is one of free co-operation with Britain—not just kicking—Winnipeg Tribune.

REMINERS OF BRAVE DAYS OF EARLY CANADA

Looking through a casement at the excavated ruins of the old French fort Le-Beauport, near Beauport, the foundation walls of other fortifications and ancient buildings in the background.

Is Automatically Set

Cheese Spray Entices Mice To Most Modern Trap

The modern mouse must be getting to be a pretty sharp fellow—at least, judging by the tricky gadgets being invented these days to catch them.

One of the latest is described by Roy C. Burns, managing director of the National Inventors' congress. "It is infeasible to the first mouse and when he enters he automatically sets it for the second mouse," explained Mr. Burns. "The first sees in front of him a modernized mouse hole, sprayed with cheese perfume, thin and elusive at the entrance and strong toward the end of the hole. He enters a hallway and looks into a lighted mirror, and he thinks his reflection is another mouse. Losing all caution, he moves into a glassed-in compartment full of mirrors, but he discovers the cheese in it. In another transparent chamber, he stops to cogitate. Another mouse outside looks in and sees a dozen mice—a whole convention—so he comes in, too. Another grate drops, and so it goes."

ALICE STEVENS' RECIPES

TOUGH CUTS OF MEAT CAN BE MADE TENDER

Tough cuts of meat are avoided by many people because they find the meat is not satisfactory. It lacks flavor and is hard to chew. This is because the meat is not properly cooked.

As a matter of fact the tough cuts of meat have a finer flavor than tender cuts in many cases and there is certainly a great difference in cost.

Extractives give meat its characteristic flavor and there is a greater quantity of extractives in the tough cuts than in the tender cuts. The quantity of connective tissue in the animal determines the toughness of the cuts. Age and exercise help to develop this. Veal is more tender than beef because of the difference in the age of the animal. The tender cuts such as Sirloin steak are found along the back, because these muscles are used very little.

Cooking tough cuts to make them tender is a matter of softening this connective tissue. There are four rules given for this.

Cook the meat slowly for a long time. Pot roasts require from 30 to 40 minutes to the pound, while oven roasts require 20 minutes to the pound. Tough cuts are used for the pot roasts and the additional time helps to soften the connective tissue.

Cook in a slightly covered pot so that the steam can help with the cooking. Grind the meat. This breaks up the connective tissue. Meat for hamburger steak is put through a meat grinder.

Put the meat in a marinade and marinate it. Sprinkle the meat with a little flour before pounding. The flour absorbs some of the juices and helps retain the flavor.

Cook the meat with an acid. The acid acts on the connective tissue and softens it. For this reason, tomatoes are often cooked with tough cuts of meat.

Try this recipe for apple rings. It makes an attractive garnish and adds to the tastiness of a meat dish.

APPLE RINGS

Wash and core apples but do not peel. Cut in half inch slices. Heat frying pan and add fat such as lard, butter or drippings from a roast of beef or pork. Fry the apple rings in this fat. Sprinkle with salt and sugar. Turn and brown on both sides. Attempt frying only one layer of rings at a time. Serve with roast pork or sausages.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

For Peaceful Ventures

Practically Every War Instrument Could Be Put To Better Use

Apparently Sir Hubert Wilkins, during his recent search for the lost Russian flyers, was preoccupied part of the time with other thoughts than those of rescue. He has developed his scheme for an undersea carrying trade, conducted by submarine, over the roof of the world.

How practicable his scheme is we would not presume to say, but one thought struck us in this regard. If Sir Hubert's plan ever materializes, it will be the first time the submarine has ever been used extensively in any peaceful venture. The submarine is a sinister craft, at the present time, essentially an instrument of death. It may yet come to serve the needs of humanity, instead of threatening to wreck civilization.

There is a moral here, which humanity, deplorably, will not heed—that almost every instrument of destruction has a civilized utility, and that the stupidity of man alone stands in the way of its peaceful employment.—Hamilton Spectator.

A Paris telephone exchange has an automatic machine that gives out the exact time, correct to the smallest fraction of a second, in clear, human tones.

THE ROLL OF A NATION

Ogden's Fine Cut has the taste that appeals to Canada's roll-up-owners from coast to coast—the fragrant flavor that makes each puff a grateful pleasure. With a package of Ogden's—and "Chanticleer" or "Vogue" papers you'll quickly see why this mild, cool fine cut is the "roll" of the nation. It's now buying a bigger package of Ogden's.

OGDEN'S FINE CUT

Makes Him Feel Better

Wisconsin Man Starts His Twenty-Seventh Winter In Bed

Arthur E. ("Turkey") Gehrmke, the hibernating, barkeeper of Watertown, Wisconsin, has bedded down for the winter. Beginning his 27th winter retreat, Gehrmke locked himself in his bedroom on the second floor of his tavern and denied himself to visitors. Even tapping on a water pipe from the main floor failed to bring a response.

Gehrmke's bartenders said he was out of circulation until spring. Meals will be sent up by dumbwaiter.

Gehrmke began retreating for the winter when he was stricken with a stomach ailment many years ago. He found that by staying in bed he felt better, and ever since then has passed the cold months in a horizontal position.

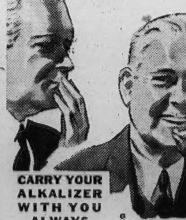

Passing Away Time

Reciting Poetry Is Fine Way States Irish Dramatist

Every school child should be made to learn at least 100 poems by heart as some protection against the tedium of life in later years, said Padraic Kavanagh, Irish poet and dramatist. "No finer way of passing an hour of enforced idleness can be found than by reciting to one's self some of the great classics," he said in an address. "The time used in pacing a railroad station platform while waiting for a train can be made to seem as nothing in this manner."

There are 47,457 miles of classified roads in Great Britain.

A MISTAKE TO WAIT WHEN "ACID INDIGESTION" STARTS

The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets—in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoonsful of liquid Phillips' from the bottle. At once you feel "gas," nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

The following steamers have been scheduled for your convenience to enable you to spend a happy Christmas among your loved ones in the Homeland.

From MONTREAL
Nov. 25—"AURANIA" to Plymouth, Harve, London.
Conductor, Mr. J. Norman Catron
Nov. 26—"LETTIAN" to Belfast, Liverpool, Glasgow

WHAT HO!

—By—
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER I.—Continued

He had adopted "Noblesse Oblige" as his own private motto; but being a Bingley, and living up to it, were not always easy in Bear Falls. There were times, and this was one of them, when he felt an exigent desire to ally forth with a baseball bat, in lieu of a battle-axe, and play requiems on the skulls of his tormentors, beginning with the large, polished skull of Otis G. Wyncoop.

However, the Wyncoopian skull, and the other skulls were unmoistened that night on the mounted tent, and decided to expend his steam on the less sanguine project of arranging his exhibit of birds and beasts for the state fair.

On this labor of love he had toiled, intermittently, for some four years. In nature, a realistic and realistic poses, he had arranged family groups of robins, orioles, quail, sparrows, muskrats, chipmunks, coons, coyotes, rabbits, gophers, wild cats, hawks, crows, badgers, cat-birds, kingfishers, skunks, swallows, otters, and other feathery and furry denizens of Iowa. Mr. Slocum, dropping in now and then from his booties, had pointed out that the commercial value of this undertaking was highly doubtful, since, as Mr. Slocum put it, the number of folks in Iowa with a craving for a houseful of varmints could be counted on the thumbs of an earl. Nevertheless, Ernest worked on. He finished the final feather on the last snipe the day before the fair opened.

CHAPTER II.

As Ernest was the sort of man who gets crowded into corners, and who in restaurants is always given a seat which commands a view of the kitchen, he found himself, and his exhibit, tucked away in an obscure corner of the exhibition hall, almost completely hidden from view by the Grundy Center Grange's display of elephantine pumpkins and mastodontic cheeses.

However, a fellow-townsman had fared better when the spaces were allotted. Mr. Otis G. Wyncoop, with masterful bellows, had demanded and received the most conspicuous spot in the centre of the great hall. Here a corps of workmen had set up the exhibit of Wyncoop's Wonder Weenies, conceived and designed by Mrs. Wyncoop, personally.

"I intend to give it," stated Mrs. Wyncoop, while in the throes of creation, a "touch of whimsy."

"Oke," said her husband, "only don't forget to feature the product. I'm selling sausages, not whimsies."

"I am aware of that," said Mrs. Wyncoop. "The sausages will not be slighted. I assure you. Now, may I have carte blanche?"

"If you need her, get her," assented Mr. Wyncoop. "Class is what I'm after. I'm a class concern."

"Class you shall have," promised his wife, "but class costs."

"Spurge away," directed Mr. Wyncoop. "I won't kick at the bills if we win the prize. The ad will be worth thousands to me. Why, say, I could tie a little blue ribbon around each individual weenie and jack up the price."

So Mrs. Wyncoop's fancies took concrete form, and the result was a floral grotto, festooned with a profusion of roses each with a tiny electric light in its artificial bosom. In good colored paper stood the good horse Tartar, caparisoned now with a saddle and bridle of snow-white leather embellished with rhinestones. Enthroned on Tartar sat a shapely young lady whose somewhat sketchy costume of gauze was supplemented by a cascade of blonde hair which rippled to her waist. She smiled alluringly at the crowd and chewed gum when Mrs. Wyncoop was not watching. Mr. Wyncoop assumed that her name was *Blanche*, and thus, to her surprise, addressed her.

Just who this nymph was supposed to be was a moot point among those who thronged around the spectacle. Some opined she was Lady Godiva, others maintained she was Joan of Arc, and others held that she was either the Spirit of the Middle West, or Miss Bear Falls. She carried a ribbon banner which bore the device, who thronged around the spectacle.

Others maintained she was Joan of Arc, and others held that she was either the Spirit of the Middle West, or Miss Bear Falls. She carried a ribbon banner which bore the device, who thronged around the spectacle.

white uniforms which made them look like a squad of lady hussars, tended a large machine of gleaming nickel. From its maw, at intervals, emerged the tid-bit that had made Mr. Wyncoop rich and famous. As the new-born weenies came out of the everywhere into the here, they were promptly collared by an efficient young hussar and popped onto an electric grill. There they sizzled until another hussar, armed with toothpicks, impaled them and presented them to passersby, and, since they were free, the passersby were numerous.

About this exhibit proudly hovered Mr. Wyncoop, who in face and figure looked like a large-scale caricature of one of his own products. However, the report that a near-sighted agriculturist from Coon Rapids had attempted to put mustard on Mr. Wyncoop's nose may be set down as a canard started by a jealous competitor. Mr. Wyncoop could be distinguished from his creations by the fact that he wore a tweed suit and had a bass voice.

With him, her slightly belated brow ready for the laurel wreath, was his wife, Armina, who wore, among other things, her Chicago shoes and her milk coat. The day was mild to the point of downright balminess, but Mrs. Wyncoop wore this furry mark of caste almost as constantly as its original coverings. The weather and the wrap conspired to make Mrs. Wyncoop wilt dandy, but she stuck to her coat, and vice versa, a martyr to a good cause. One of the three judges who would presently pass on the exhibits was no less a personage than Mr. Clara Phelps, active president of three clubs, past president and founder of two others, and a member of a score more, to whom, socially, Mrs. Wyncoop was as an ant-hill to an alp. In her mansion in Des Moines, Mrs. Phelps conducted a celebrated salon at which worthy causes were espoused, *awards* and *yogis* expounded their esoteric philosophies, and papers were read on the Lake Poets, Bach and penology. To sit in this select circle and inhale lungfuls of culture was Mrs. Wyncoop's most ardent ambition. So she wore her milk coat, as a badge and a symbol. Mrs. Phelps had one, and Mrs. Wyncoop cherished the hope that Mrs. Phelps would sense that they were sisters under the skin.

Friking in the shadow of his parents was their son and heir, Master Mervin Wyncoop, in the electric blue and *corset* uniform of a brigadier general in the Bear Falls Military Academy, "a he-school for manly boys." Master Mervin, looking like a junior weenie, was tickling strangers with a feather-duster, bought for that express purpose, and was planning to ruffle the composure of the young lady on the horse as soon as a suitable opportunity presented itself. To keep in training for this enterprise, Master Mervin, every minute or so, snatched with nimble, chubby hands one of the sausages spitting on the grill, and bolted it whole, displaying a pelican-like capacity astonishing in one of his tender years. The many bright brass buttons on his uniform tugged at their moorings, and he began to bulge, visibly, in all directions. Still he continued to stoke himself with sausages, while Wyncoop senior beamed his approval. Just as the roomy Mervin threatened either to contradict all the known laws of physics, or explode, the committee of judges, in solemn procession, approached the Wyncoop exhibit.

Mrs. Clara-Martha Phelps, as befitted her rank, came first, followed by a lean Congressman and a fat Mayor. Mrs. Phelps was a giraffe-shaped lady, two ladies tall, and one lady wide.

Mental Cases

Number Of Alberta Patients Not Out Of Line With Normal Rate In Canada

Rate of increase in the number of patients in Alberta institutions is not "out of line" with the normal rate across Canada, a provincial health department official said at Edmonton.

Commenting on the statement of Capt. Cecil Bull (lab. South Okanagan) in the British Columbia legislature at Victoria that people were being taken at the rate of three a week to asylums from the Alberta drought area, he stated:

"We have not segregated the patients and therefore cannot say what numbers are being received from particular districts."

"At the Ponoka institution we admit an average of 600 patients a year and let out about 450, leaving the increase at approximately 150, which is about the average rate for Canada."

The name "tin cans" is derived from the term, tin canisters, by which they were known in England during the latter part of the 19th century.

Insist on AIR CELL

Thanks to modern science, the old nuisance of recharging "A" batteries has been ended forever. Eveready AIR CELL, the best source of "A" power for radio sets, never needs to be recharged. It renews its power from the air, day in and day out.

Install an Eveready Air Cell in your radio—and forget about "A" power for 1,000 playing hours! All you need to do is to add a little ordinary water every few months. Think of the trouble you save yourself—to say nothing of the money!

Remember this, too, about Air Cell. It maintains its full power to the end. No periods of fading power which spoil reception.

Eveready Air Cell is not an experiment. It has proved its worth for seven years—in every type of Air Cell receiver.

Don't waste money on fads and experiments which you hope will work! You can count on Air Cell—it's guaranteed for a minimum of 1,000 playing hours!

Little Helps For This Week

Be of good courage and He shall strengthen your heart, all ye that hope in the Lord. Psalm 31:24.

In heavenly love abiding,
No change my heart shall fear;
And safe is such confiding,
For nothing changes here.

A true Christian that has power over his own will may live nobly and happily and enjoy a clear heaven within the serenity of his own mind perpetually. When the sea of this world is most rough and tempestuous about him, then can he ride safely within the haven by a compliance of his will with God's will. He who has the mastery over his own will feels no violence from without, finds no contests within; and when God calls him out of it so world he finds in himself the power to lay down his own life, neither is it so much taken from him as it is quietly and freely surrendered up by him to God who gave it.

They were unpacking their goods for a week-end's camping. "George!" thundered the massive wife as she came upon an unopened bottle of whisky, "what's the meaning of this?"

"That's all right, my dear. I brought it along to stick a candle in when it's empty."

Apples growing on neighboring trees were baked by the intense heat of the flames during a sawmill fire at Durley, South Ham, England, in 1930.

Blessed are the nobodies. The calamities that befall great nations are brought about only by great men.

Bandit Is Killed

Italy's Public Enemy No. 1 Is Slain By A Shepherd

Italy's public enemy No. 1, Domenico Diana, accused of 10 murders during the past five months, was killed by a shepherd armed only with a small pocket knife.

After a hand to hand tussle, the shepherd killed the bandit, who had eluded a nation-wide search during the past few months.

Some time ago the bandit was convicted of participating in a hold-up. He swore to murder every witness at the trial and when released from prison five months ago proceeded to carry out the threat.

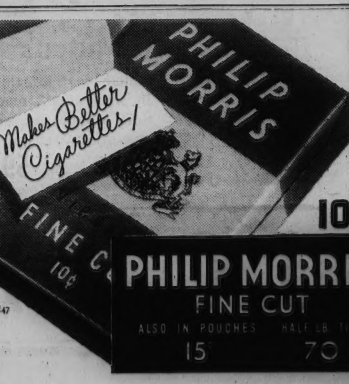

The star Arcturus is 11,000,000 times farther away from the earth than the sun.

Action Well Advised

Fort William Board Of Health Bans Auto Horn Tooting

The Fort Arthur News-Chronicle reports that the Fort William Board of Health is taking action to stop the nuisance of auto horn tooting and says it is well advised. Auto horns are tooted too often and too long. Autos should, as a rule, be seen and not heard. The best drivers scarcely ever use the horn. They drive where the road is open, and when necessary, use the brakes. They don't go around the streets blowing their horns to warn every one else to keep out of the way.

Gold hoardings in India are such that no one can accurately estimate the amount; the common estimates, however, set it at above \$5,000,000,000.

WINTER

A stock of Winter Goods for your convenience. You may fill your needs without delay from nationally known makes of dependable merchandise at competitive prices

NEEDS!

Womens' Suggies

A comfortable Vest or Partie garment for women—Waffle knit from 60 per cent wool and 40 per cent lisle yarns. Neat fitting sleeveless vest; snug-gy is in flesh shade. **59c**

ALL-WOOL SNUGGIES—

Same as the above but made from fine all-wool yarns, in flesh shade. No irritation; **79c**
no bulk. Priced at

LISLE SNUGGIES—

For those who like a lisle garment even in winter. These are nicely made and finished. **29c**
flesh shade. Priced at
